

certero AssetStudio®

For Windows & Mac OS

certero®
for certain for sure

Enterprise Software Asset Management (SAM) solution for Windows & Mac OS that delivers advanced IT Asset Management (ITAM) and Software License Optimization & Entitlement (SLOE) capabilities

AssetStudio for Windows & Mac OS can help any organization accelerate the SAM journey. From the starting point of establishing an Effective License Position (ELP) ensuring compliance, to taking a pro-active approach to tackling the wasted spend from software that is purchased and never used.

It provides a complete view that combines knowledge of the infrastructure, built-in intelligence on vendor licensing rules and rights of entitlement and information on actual software usage.

Discovery and inventory

Complete visibility and centralized control of hardware and software assets with advanced discovery and inventory using agent and agentless technology.

Licensing

Automate license management of key vendors with 'pre-canned' intelligence on Microsoft and Adobe licensing rules and upgrade/downgrade rights, and software assurance.

Apps Monitor

Our unique approach to metering enables AssetStudio for Windows & Mac OS to monitor the usage of all on premise and Web-based applications at all times.

Distribution

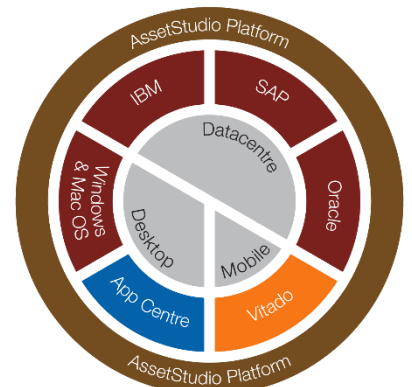

Provides remote software delivery to take advantage of additional automation by automatically targeting computers based on pre-defined criteria. Also, integrates with SCCM to take advantage of existing policies.

Access Control

Enforces compliance in thin client environments like Citrix and Terminal Services.

Benefits

- ✓ Simplifies SAM with intelligent automation
- ✓ Provides complete visibility of all hardware and software
- ✓ Enables compliance enforcement in thin client environments
- ✓ Automate license management and ensure compliance
- ✓ Reduce overspend and under-utilization of software

“AssetStudio has given us a single, holistic view of our network. In the past it was difficult to manage with dispersed, remote assets but we now feel like we have all of the information we need at our fingertips.

“The Software Licence Optimisation (SLO) capabilities ensure that we have an accurate understanding of the software that is in use and we can use this to improve decision making. I would certainly recommend AssetStudio to any organisation looking for an advanced solution for both ITAM and SLO.”

Andrew Jones, Eurobodalla Shire Council

About Certero

Certero are a vendor and supplier of products and solutions for: Software Asset Management (SAM), Software License Optimization and Entitlement (SLOE) and IT Asset Management (ITAM). Complimented by tailored services, our mission is to provide the best solutions that work individually and holistically together, seamlessly and optimally on a single platform.

Key features

Powerful inventory

Optional agent and agentless inventory across multiple platforms, includes self-deployment capability of efficient agent technology.

Control thin client environments

Actively control access to software by device or user, critical for adhering to device-based licensing rules within Citrix and Terminal Services environments.

Supports all major virtualization platforms

Enhanced virtualization support covering all the major platforms HP, VMware, Windows, Citrix, IBM, Oracle and Linux. Ensures license compliance.

Vendor-specific licensing intelligence packs for Microsoft and Adobe

Automates the complex reconciliation process by providing built-in intelligence on the multitude of upgrade rights, downgrade rights and Software Assurance benefits.

Supports SAM in the cloud

Feature-rich SaaS – traditional or enriched SaaS with the same capabilities as an on-premise solution for any AssetStudio product.

Secure

Secure SSL communication both internally and externally.

Stakeholder alerting

Whenever an important change occurs such as license expiry, or a compliance risk with an expensive product, AssetStudio for Windows & Mac OS can notify you.

Part of AssetStudio software asset management platform

Highly scalable modular products that are uniquely designed to work stand-alone or together optimally as part of the AssetStudio platform, or even complementing 3rd party solutions.
