Cyble Brand Intelligence

Stop Brand Impersonation and Mitigate It Through Rapid Takedowns

Introduction

In the digital age, protecting your brand's reputation is more critical than ever. Cyble's Brand Intelligence offers comprehensive protection against brand impersonation, phishing campaigns, and online fraud. Through our AI-powered threat intelligence and automated takedowns, Cyble ensures your brand remains secure, safeguarding your digital perimeter against fraudulent activity and malicious threats.

| Key Benefits

Immediate Brand Protection

Identify and neutralize phishing schemes, fake mobile apps, and fraudulent websites that infringe upon your brand.

Rapid Takedowns

Launch quick and efficient takedowns of typosquatting domains and phishing websites.

Automated Defense

Automate the detection and removal of brand abuse, reducing your security team's workload and improving response times

Wide-Reaching Security

Expand your security measures to cover every corner of your online presence, ensuring customer trust and brand integrity.

| Key Capabilities

- **Fake Mobile App Detection:** Cyble identifies and eliminates fraudulent mobile applications that could harm your brand's reputation and lead to financial loss.
- **Phishing Intelligence:** Detect and respond to phishing campaigns across multiple platforms, mitigating the risk of data breaches.
- **Brand Mentions Monitoring:** Cyble monitors online conversations, forums, and social media platforms for mentions of your brand, allowing for timely responses to potential threats or concerns.
- **Brand Impersonation Detection:** Identify fake accounts and quickly have them removed to protect your brand's digital assets from unauthorized use by cybercriminals.
- **Suspicious Domains Scanning:** Cyble scans domains for potential risks or unusual behavior, providing insights to take proactive action against emerging threats.

How It Works

1

Stop

Cyble helps stop brand impersonators by reducing the risk of digital fraud, brand abuse, and theft of sensitive information. With our advanced monitoring tools, we detect brand misuse in real-time, allowing for immediate response.

2

Eliminate

Neutralize phishing sites, campaigns, and fraudulent activities targeting your brand across the web. Our platform helps you act quickly to mitigate these threats.

3

Takedown

Launch rapid takedowns of websites that violate trademarks or infringe copyrights. Cyble ensures fast removal of typosquatting domains and other fraudulent entities, protecting your brand's online reputation.

4

Automate

Cyble automates the detection and takedown processes for phishing sites, typosquatting domains, and intellectual property violations, saving your team's time and resources while enhancing security.
