Digital life protection

Consumer offering

WHY ESET?

ESET is a global digital security company whose award-winning technology secures over one billion internet users and hundreds of thousands of businesses. We offer next-gen solutions that safeguard all aspects of the digital experience: comprehensive privacy, identity and device protection. Our mission? To secure the digital lives of our users, empowering them to successfully work, aspire, connect and dream.

ESET brings over 30 years of technology-driven innovation to the digital security industry. Our offerings are available across all major operating systems and are anchored in three pillars of protection:

- The core elements of digital security: protecting users from different types of malware and data theft, ensuring safe online transactions, monitoring network and router security, and more.

- Privacy and identity protection: providing users with the tools to safely manage their personal data. This includes unlimited VPN security, seamless password management, ultra-secure data encryption and other powerful functionalities.

- Smart home protection: securing everything from PCs, laptops and smartphones to smart TVs and IoT devices.

We adopt an unmatched, prevention-first approach to technology. Grounded in science, our solutions marry artificial intelligence and human expertise. Combined with multilayered security technology and live cloud protection, they proactively and reactively defend against modern cyber threats. In other words? We don't just stop breaches—we prevent them.

ESET is dedicated to solutions that are easy to use and light on resources, allowing users to work, browse and entertain without slowdown. We have been consistently recognized by AV-Comparatives—among other organizations and industry media—for our high quality of service. We house 13 Research & Development centers worldwide, with over 175 experts in our research labs and significantly more in our Technology division. This allows us to innovate new solutions and stay one step ahead of attackers.
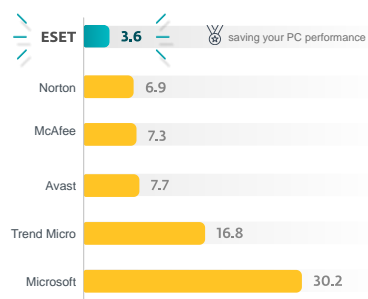

ESET operates in 195 countries and provides comprehensive local support: assistance in a wide range of languages from over 60 customer care centers across 37 time zones.

As champions of science, education, and progressive technologies, we remain committed to socially responsible practices. Our Corporate Social Responsibility engagements include Safer Kids Online, Women in Cybersecurity, and the ESET Science Award.

In a world where technology enables progress, choose ESET for your home.

Progress. Protected.

Lowest impact on performance

ESET	**3.6** — saving your PC performance
Norton	6.9
McAfee	7.3
Avast	7.7
Trend Micro	16.8
Microsoft	30.2

Results based on AV-Comparatives - Independent Tests of Anti-Virus Software (PDF)

In 2023, ESET was awarded Best in Class by AV-Comparatives for having the lowest impact on system performance compared to our key competitors. Our technology marries high-speed performance with rock-solid digital security—maximizing speed, minimizing risk.

WHEN TECHNOLOGY ENABLES PROGRESS, ESET® IS HERE TO PROTECT IT.

ESET HOME: ONE PLATFORM, COMPLETE SECURITY MANAGEMENT

THE BASICS: What is it?

ESET HOME is a user-friendly platform that allows you to activate and renew your subscriptions, add and protect new devices, and download or upgrade your security solution. Share your subscription with friends and family, or monitor your security status. Enable powerful functionalities like Identity Protection, VPN security, Password Manager, and more. ESET HOME is available via web portal or mobile application.

FEATURES & BENEFITS:
What can you do with the ESET HOME platform?

Review your security status
Receive detailed information about the security of all devices connected to your account—issues, updates, reports and more.

Download, update and upgrade
Use your account to download protection that is automatically activated and easy to navigate. Monitor, customize, renew and upgrade subscriptions as needed.

Protect friends and family
Share the love in just a few clicks. With your ESET subscription, friends and family can create their own accounts, safeguard their devices, and manage their digital security.

Stay secure with Anti-Theft
Protect your device against theft or loss. The Anti-Theft functionality allows you to easily lock, track and locate devices, preventing unwanted access to your data and safeguarding your privacy.

Ensure a safe digital environment with Parental Control for Android
Manage your child's digital activities by setting healthy boundaries (including time limits), curating safe content, and staying up to date on their whereabouts.

Benefit from Identity Protection, Password Manager, VPN security and more
Use ESET HOME to enable powerful security features. Identity Protection uses dark web monitoring to prevent identity theft. Password Manager helps you safely store and organize passwords. The VPN secures your network connection in public and private spaces and offers unrestricted bandwidth for unlimited access to online content. With ESET HOME, there's much to discover.

All this and more.

Use ESET HOME to manage, protect and elevate your digital life—go to www.eset.com for more information.

ESET HOME SECURITY ESSENTIAL

THE BASICS: What is it?

Protection made simple. ESET HOME Security Essential delivers comprehensive security for your digital life, all built around ESET's award-winning multilayered technology. Use it to secure your smart home, shield your webcam, benefit from safer browsing and online banking, and more.

KEY FEATURES
How do you benefit?

Safe Banking – This functionality features a secured browser mode, offering automatic protection when banking online and accessing web-based crypto wallets. Communication between the keyboard and browser is also encrypted, ensuring safer transactions and protection from keyloggers.

Safe Browsing – Safeguard your online activities with a secured browser mode. This functionality offers an additional layer of browsing protection, defending against malware, keylogging and other types of digital threats. It is automatically activated for all compatible browsers.

Browser Privacy & Security – A browser extension for elevated security and privacy. Easily distinguish between safe and unsafe search results. Stay protected from phishing websites and other threats. Clear your browser data on demand or automatically, reducing digital clutter and optimizing browser efficiency.

Webcam Protection – This functionality monitors your computer for attempts to use your webcam. It alerts you to unexpected attempts and allows you to block them—a simple way to boost your privacy.

Network Inspector – Test your home router for vulnerabilities, such as weak passwords or out-of-date firmware. This functionality provides an easy-to-access list of connected devices and allows you to scan smart devices for vulnerabilities. Users also receive suggestions for how to resolve security issues.

Modern Endpoint Security – Enjoy protection from online and offline threats and block the spread of malware to other users. This endpoint security prevents, detects and resolves security incidents.

This and much more—includes additional features for a secure digital life.

Seamlessly manage and maximize ESET HOME Security Essential with ESET HOME—the complete security management platform.

Once installed, always protected.

ESET HOME SECURITY PREMIUM

THE BASICS: What is it?

ESET HOME Security Premium proactively protects your digital life against ever-evolving threats. Manage passwords, secure data, and safeguard online transactions with powerful encryption and award-winning multilayered technology. Enjoy enhanced privacy while browsing and banking online. This solution is feature-rich and—in true ESET fashion—light on resources.

KEY FEATURES
How do you benefit?

Safe Banking – This functionality features a secured browser mode, offering automatic protection when banking online and accessing web-based crypto wallets. Communication between the keyboard and browser is also encrypted, ensuring safer transactions and protection from keyloggers.

Safe Browsing – Safeguard your online activities with a secured browser mode. This functionality offers an additional layer of browsing protection, defending against malware, keylogging and other types of digital threats. It is automatically activated for all compatible browsers.

Browser Privacy & Security – A browser extension for elevated security and privacy. Easily distinguish between safe and unsafe search results. Stay protected from phishing websites and other threats. Clear your browser data on demand or automatically, reducing digital clutter and optimizing browser efficiency.

Webcam Protection – This functionality monitors your computer for attempts to use your webcam. It alerts you to unexpected attempts and allows you to block them—a simple way to boost your privacy.

Network Inspector – Test your home router for vulnerabilities, such as weak passwords or out-of-date firmware. This functionality provides an easy-to-access list of connected devices and allows you to scan smart devices for vulnerabilities. Users also receive suggestions for how to resolve security issues.

Modern Endpoint Security – Enjoy protection from online and offline threats and block the spread of malware to other users. This endpoint security prevents, detects and resolves security incidents.

Password Manager – All you need to remember is your master password! Use this functionality to safely store and organize passwords, automatically fill in forms and generate highly encrypted passwords. Secure your browsing history remotely and receive alerts when your passwords are at risk. iOS face detection is integrated, and two-factor authentication (2FA) with Google Authenticator can be incorporated.

Secure Data – Boost your privacy and security with powerful encryption of files and removable media. Prevent data theft in the event of USB or laptop loss, and ensure secure collaboration and data sharing.

This and much more—includes additional features for a secure digital life.

Seamlessly manage and maximize ESET HOME Security Premium with ESET HOME—the complete security management platform.

Once installed, always protected.

ESET HOME SECURITY ULTIMATE

THE BASICS: What is it?

ESET HOME Security Ultimate delivers top privacy, identity and device protection for a worry-free digital life. Boost your security with Identity Protection and secure your network connection with the unlimited VPN. Seamlessly manage passwords, encrypt data, shop with confidence and more. With features like Browser Privacy and Security (the extended version), your information will stay where it should—with you.

KEY FEATURES
How do you benefit?

Safe Banking – This functionality features a secured browser mode, offering automatic protection when banking online and accessing web-based crypto wallets. Communication between the keyboard and browser is also encrypted, ensuring safer transactions and protection from keyloggers.

Safe Browsing – Safeguard your online activities with a secured browser mode. This functionality offers an additional layer of browsing protection, defending against malware, keylogging and other types of digital threats. It is automatically activated for all compatible browsers.

Browser Privacy & Security – A browser extension for elevated security and privacy. Easily distinguish between safe and unsafe search results. Stay protected from phishing websites and other threats. Clear your browser data on demand or automatically, reducing digital clutter and optimizing browser efficiency. With the Ultimate tier, you'll benefit from additional features to secure personal information and boost your browsing experience. Use the unique Metadata Cleanup to remove metadata from images uploaded to your browser, or Website Settings Review to effortlessly review and manage website permissions.

Webcam Protection – This functionality monitors your computer for attempts to use your webcam. It alerts you to unexpected attempts and allows you to block them—a simple way to boost your privacy.

Network Inspector – Test your home router for vulnerabilities, such as weak passwords or out-of-date firmware. This functionality provides an easy-to-access list of connected devices and allows you to scan smart devices for vulnerabilities. Users also receive suggestions for how to resolve security issues.

Modern Endpoint Security – Enjoy protection from online and offline threats and block the spread of malware to other users. This endpoint security prevents, detects and resolves security incidents.

Password Manager – All you need to remember is your master password! Use this functionality to safely store and organize passwords, automatically fill in forms and generate highly encrypted passwords. Secure your browsing history remotely and receive alerts when your passwords are at risk. iOS face detection is integrated, and two-factor authentication (2FA) with Google Authenticator can be incorporated.

Secure Data – Boost your privacy and security with powerful encryption of files and removable media. Prevent data theft in the event of USB or laptop loss, and ensure secure collaboration and data sharing.

VPN – Secure your network connection in public and private spaces. The VPN prevents data theft and unwanted tracking and keeps you safe with an anonymous IP address. With unlimited bandwidth, you'll get unlimited access to online content. Easily share it with friends!

Identity Protection – Designed to prevent identity theft, this functionality monitors the dark web for data breaches and leaked customer information.

This and much more—includes additional features for a secure digital life.

Seamlessly manage and maximize ESET HOME Security Ultimate with ESET HOME—the complete security management platform.

Once installed, always protected.

ESET NOD32 ANTIVIRUS

THE BASICS: What is it?

ESET NOD32 Antivirus offers fast and light antivirus technology. With the ESET NOD32 engine at its core, it provides essential malware protection and allows you to secure your data and money from digital fraud. Monthly security reports keep you informed, while Gamer Mode saves resources for uninterrupted entertainment. Simple yet effective, this digital security solution blends detection, speed and usability. Secures Windows and macOS devices.

KEY FEATURES
How do you benefit?

Antivirus and Antispyware – This functionality provides comprehensive protection from online and offline threats and blocks the spread of malware to other users.

Anti-Phishing – Safeguard your privacy and your assets. Anti-Phishing protects you from scams and fake websites attempting to access sensitive information or feed you fake news.

Ransomware Shield – Ensure that your data stays private and secure. The Ransomware Shield blocks attempts to lock you out of your personal data in exchange for a ransom payment. It uses advanced behavior-based detection to shield you from malware threats and device damage.

Exploit Blocker – This functionality prevents attacks designed to bypass antivirus detection. It fortifies commonly-exploited application types such as web browsers, PDF readers, and other applications.

Advanced Machine Learning – In addition to ESET Machine Learning in the cloud, this functionality offers a proactive layer of local security. It is designed to detect advanced and never-before-seen malware—all without slowdown.

Small System Footprint – Extend the life of your hardware, ensure strong system performance and save internet bandwidth via small update packages.

Gamer Mode – This functionality ensures that your media runs quickly and smoothly. It postpones alerts and notifications to save resources, disables pop-up windows, and halts the activity of the scheduler. Your ESET protection still runs in the background, but does not demand any interaction—excellent for giving presentations or enjoying uninterrupted entertainment.

This and much more—includes additional features for a secure digital life.

Seamlessly manage and maximize ESET NOD32 Antivirus with ESET HOME—the complete security management platform.

Once installed, always protected.

Please note: functionalities may differ depending on operating system.

ESET MOBILE SECURITY FOR ANDROID

THE BASICS: What is it?

Say goodbye to viruses, ransomware, adware, phishing, and other types of malware. ESET Mobile Security for Android provides comprehensive protection for your smartphone or tablet. It allows you to safely browse and bank online, safeguard your device against digital threats, and take action against loss or theft. Stay safe and informed with automatic scanning and security monitoring.

KEY FEATURES
How do you benefit?

Antivirus – Guard against online and offline threats, including viruses, trojans and ransomware, all supported by our powerful antivirus technology.

Anti-Phishing – Safeguard your privacy and your assets. Anti-Phishing protects you from scams and fake websites attempting to access sensitive information or feed you fake news.

Payment Protection – Manage your online banking with confidence. With Payment Protection, you'll benefit from additional security when using financial applications.

Network Inspector – Test your home router for vulnerabilities, such as weak passwords or out-of-date firmware. This functionality provides an easy-to-access list of connected devices and allows you to scan smart devices for vulnerabilities. Users also receive suggestions for how to resolve security issues.

Proactive Anti-Theft – Secure your smartphone or tablet against loss or theft. Initiate automatic monitoring to view the location of your device on a map and create a custom message for display on your screen. Access your smartphone or tablet's camera to observe its surroundings and easily collect and upload screenshots from your device—all improving your chances at retrieval.

App Lock – Secure access to your apps via PIN code or fingerprint identification. App Lock allows you to prevent unauthorized access to selected applications, even when your device is unlocked.

Scheduled Scanning – Be proactive rather than reactive. Boost the security of your device with automatic scans of all apps, installation files and connected USB devices.

Security Audit – Easily monitor and adjust your device settings. This functionality allows you to review the permissions of your installed applications to help prevent security risks and incidents.

This and much more—includes additional features for a secure digital life.

Seamlessly manage and maximize ESET Mobile Security with ESET HOME—the complete security management platform.

Once installed, always protected.

ESET PARENTAL CONTROL FOR ANDROID

THE BASICS: What is it?

ESET Parental Control for Android provides kids and families with a safer digital experience. Easily adjust your child's access to online and offline content, and establish a healthy digital routine by managing application and internet use.

As part of its child-friendly interface, ESET Parental Control provides simple explanations of rules and settings—allowing kids to understand the benefits and reasoning behind them, and to dialogue with parents or guardians about blocked content. This product includes detailed security reports and instant communication with your child via notifications and must-read messages.

KEY FEATURES
How do you benefit?

Web Guard – Set healthy boundaries with website monitoring and blocking. Simply enter your child's age and automatically block inappropriate content via age-based browsing categories. This functionality includes Safe Search and Browsing Report for added security and insight into your child's online activities.

Application Guard – Customize your child's digital experience. This functionality blocks the installation of age-inappropriate apps. Use it to define how long an application can be used and to limit app use during specific hours, such as school or sleep.

Child Locator – Check your child's location at any time. Location is primarily determined via GPS. When GPS data is unavailable, an approximate location can be determined via Wi-Fi or GSM network.

Geofencing – Stay up to date on your child's whereabouts. Define and authorize multiple geographic zones, and receive alerts whenever your child enters or leaves them.

Unblock Request – With this functionality, kids can request access to specific sites and applications that are currently blocked.

This and much more—includes additional features for a secure digital life.

Seamlessly manage and maximize ESET Parental Control with ESET HOME—the complete security management platform.
